Hillside, N. J.

To Our Dahlia Loving Friends and Customers:

We again express our thanks and appreciation for the splendid support given us and for your letters commending our stock, our square dealings, and telling of successes with the roots and plants purchased of us. We will continue to do our utmost to make every transaction entirely satisfactory at all times.

Here are a few abstracts from numerous letters received:

From North Carolina—"Plants arrived in splendid condition and are fine looking."

From Ohio—"Have a fine garden of Dahlias, thanks to the fine lot of plants purchased of you."

From Connecticut—"Am very well satisfied with the Dahlias that I purchased of you last year."

From Alabama—"Your plants of Satan did well both as to blooms and roots, and were the sensation of the Dahlia Show held at the Thomas Jefferson Hotel."

From Ohio—"I never have received finer looking, better packed plants; they are nice, stocky fellows that carried perfectly."

From Oregon—"Plants arrived in fine condition with exception of one which was broken. All are growing fine." Note—36 plants made up this shipment.

We use our best efforts to keep our stock absolutely healthy and free from disease by the destruction of "stunts" and by discarding those that do not come true.

We have kept our list of varieties limited by retaining a very high percentage of those that are placed on the "Honor Roll" consecutive seasons.

The varieties mentioned herein are of exceptional merit and **may be grown to Your Complete Satisfaction**, if you will **Dig Deep, Cultivate Regularly** and **Keep Insects Under Control**, particularly the leaf hopper.

(For spraying we use "Evergreen" or "Red Arrow.")

READ CAREFULLY

Owing to the abnormal conditions we have lowered prices and are making further concessions, i.e., on retail orders amounting to \$5.00 to \$10.00, you may select **20% in additional stock free**; over \$10.00, **25% free**.

Terms. Cash with order or 25% deposit, balance at shipping time. Orders over \$1.00 sent prepaid. In ordering green plants to be shipped further than 1st zone, add 25 cents for **Special Delivery** to insure plants arriving in good growing condition. We pay all other charges.

P R E M I E R D A H L I A G A R D E N S

Shipments. Roots, May 1st to June 1st.
Plants, May 15th to June 10th.

Guarantee. All stock sent out in first class growing condition, guaranteed to be healthy and true to name and to grow if cared for on arrival and after planting and that all not proving such will be cheerfully replaced upon word from the purchaser.

Notify us immediately if anything is unsatisfactory when received or if root does not start to grow within three weeks after planting. Our roots are field grown, in soil treated with Potash, for the production of exhibition blooms.

READ FREE STOCK OFFER

—————:o:—————

OUR SQUARE DEALINGS HAVE BEEN COMMENDED BY ALL

—————:o:—————

Canadian Customers. Arrange for the importation of Nursery Stock from the United States with the Secretary of the Destructive Insect and Pest Act Advisory Board, Dept. of Agriculture, Ottawa, and file the permit with the Collector of Customs so shipments may be cleared, sending the number of the permit to us that we may place it on the shipment. Owing to the extra hazards caused by inspections, repacking and delays, we cannot guarantee safe delivery of plants. The delivery of roots proving far more satisfactory.

Order Early to avoid disappointment, as orders are filled in rotation. The stock of some of the varieties is limited.

Sincerely yours,

GEORGE H. SWEZEY

PREMIER DAHLIA GARDENS

31 MERTZ AVENUE HILLSIDE, N. J.

JOIN THE AMERICAN DAHLIA SOCIETY

If you are not a member of this great Society you should join by all means. The dues are only \$2.00 the year, which entitles the members to the Bulletin free. The vast amount of useful information published in each issue of the Bulletin is worth many times \$2.00 to any Dahlia grower.

Mr. C. Louis Alling, West Haven, Conn., is Secretary.

1934 INTRODUCTIONS

ELISSA LANDI (Cordes) — Winner of the Henry F. Michell Medal at 1933 Camden Show and on Honor Roll. An informal decorative in a clear brilliant salmon orange; long straight stems; fully insect resistant; profuse bloomer; keeps well when cut; has size and depth; will stand out in any garden on account of its attractive color and splendid growing habits. Plants \$5.00.

HARRIET NEALE (Wickersham-Ruschmohr) I D—The American Home describes this as "A golden Marmion; refined in form and daintily beautiful." Profuse bloomer of large golden exhibition blooms. On Honor Roll. Plants \$5.00.

LOIS MARION (Detjen-Ruschmohr) I C — A large, beautiful, incurved cactus of gold and cream. On Honor Roll. Plants \$3.75.

LORD OF AUTUMN (Almy) I D—A huge, rich deep golden yellow bearing blooms 11 to 12 inches across by 7 to 9 inches deep; the long pointed and slightly twisted petals re-curve till stem is entirely hidden for 6 inches or more, making a flower resembling a giant "Mum." On Honor Roll. Plants \$7.50.

LOUISE BATES (Cordes)—Here is another fine introduction that was awarded a Certificate of Merit at Storrs. A huge lavender semi-cactus on long strong stems, having insect resistant foliage; very prolific, bearing many flowers over 10 inches at one time; with disbudding and pruning to four canes, can be grown to 14 inches. Plants \$5.00.

MAN O' WAR (Boone-Ruschmohr) I D—Was the outstanding dark rich carmine red of the season and one of the best keepers. Winner of the American Home Achievement Medal in 1932 and on 1933 Honor Roll. Plants \$5.00.

MONMOUTH QUEEN (Kemp) F D—In this fine dahlia we have a most pleasing color effect, it being picric yellow in the center of the flower with graduation of light primrose to cream yellow near petals; flowers 10 x 4½ inches on long stiff stems; prolific bloomer; insect resistant. Winner at Asbury Park and Red Bank 1933 Shows. Plants \$4.50.

MONMOUTH RADIANCE (Kemp) I D — A wonderfully beautiful informal decorative of light coral pink front effect with deep prim-

rose back ground that radiates throughout the entire flower; flowers reach a diameter of 11 inches and over, and a depth of 5 or 6 inches, held high above foliage on long stiff stems; strong robust grower. Winner of American Home Achievement Medal and a head liner on 1933 Honor Roll. **Plants \$6.00.**

MONMOUTH SUNBURST (Kemp) F D—Another beautiful dahlia of brilliant lemon center with salmon orange background producing a realistic sunburst effect; flowers 9 x 7 inches face upward on stiff stems; exceedingly prolific. An Honor Roll dahlia of much merit and a great favorite with visitors. **Plants \$3.75.**

SPOTLIGHT (Cottage Grove)—New informal decorative of clear sulphur yellow, lighter at tips; blooms 10 to 12 inches and 6 inches deep; tight centers; long rigid stems. Winner of American Home Achievement Medal and three firsts in Sweepstakes. Honor Roll. **Plants \$5.00 net.**

WASHINGTON GIANT (Lee) I D—The sensation at Portland. Mr. Derrill W. Hart's description of this unusual variety follows: "Winner of the American Home Achievement Medal at Portland. Here is a real lavender in a finely formed flower; the blooms are streaked with silver, and as it grew with me, showed silver petaloids near the center of the flower. It is an aptly named flower on extra good stems." Honor Roll. **Plants \$5.00 net.**

WOOLROC (Ruschmohr)—A very beautiful informal decorative of gold and tan that has won at many Eastern Shows. **Plants \$5.00.**

PREMIER DAHLIA GARDENS

	Root Plant
AGALIA—Orange fawn overlaid salmon, very fine50
LITTLE JEWEL (Min. F D)—Bloom 2 x 1. Color is a pleasing peach blossom pink. Exceptionally fine cut flower especially for decorations35
PINK PEARL—MIN. PEONY OR CHARM DAHLIA — Lovely rose pink, showing a golden disc. Petals are waved and twist like an aster flower. Plants about 3 feet tall, always covered with blooms.....	.50
Special—One each of the above 4 varieties in Roots or Plants for \$1.75	

—————:o:—————

EARLY FLOWERING HARDY CHRYSANTHEMUMS

The varieties we supply are perfectly hardy provided they are not water soaked all winter or frozen by lying in ice that has formed about them. They should be given a slight protection of dry leaves, straw, pine needles or peat and if in well drained soil will survive without any losses. They should be divided in the spring so that one shoot remains to make the future plant. Open flowers are injured by the severe frosts, but the unopened buds are unharmed and **flowers may be enjoyed long after the Dahlia blooms are gone.**

We offer plants from 2½-inch pots at greatly reduced costs, giving an opportunity to secure choice collections carefully balanced in colors of white, pink, amber, orange, yellow and others.

Six plants for..... \$1.00

Fifteen plants for..... 2.00

One hundred plants for.....10.00

Used in conjunction with Dahlias they make a most glorious fall garden.

Note — Chrysanthemums cannot be shipped outside Japanese beetle zone.

31 Mertz Avenue, Hillside, N. J.

—————:o:—————

HOW TO GROW GIANT DAHLIAS

Dahlias are easily grown, requiring no special skill to bring them to perfection.

They prefer a sunny location but do well in partial shade but should not be planted near large trees or close to buildings.

They grow best in light, porous soil having good drainage. Sand, pulverized wall plaster, or fine coal ashes should be added to lighten heavy clayey soils.

If manure is used it should be well rotted (best applied in the Fall) and thoroughly mixed with the soil which should be dug deep (12 to 18 inches).

A green cover crop of Winter Rye planted in the Fall and turned under in the Spring will add valuable humus to the soil. If the ground is worked over early in the Spring, good results will be obtained by planting a cover of Oats and Canada Field Peas. Green cover crops should not be permitted to grow tall and harden and should be turned under when about 12 inches high. They will then rot in from two to three weeks without loss of their benefits. About a week before planting time broadcast and spade under, commercial fertilizer of 4 per cent nitrogen, 8 per cent phosphoric acid and 6 per cent potash (advertised as 4-8-6). Five pounds should cover approximately 200 square feet.

Dahlias may be planted from May 1st to July 1st, but in this locality June 1st to June 15th is best. They should be planted three feet apart in rows and the rows should be at least three feet apart, four feet or more is better if room is available.

Drive a stake to support each plant. The stake should be four or five feet above ground.

Never plant clumps, but separate the tubers, planting only one in each hole, being sure they have a growing eye. Lay tuber flat with eye up and two or three inches from the stake and about six inches deep. Cover two inches with pulverized soil gradually filling to level as plant progresses. Keep the top soil finely pulverized at all times by cultivating frequently; never allow it to harden.

Watch for cut worms and protect plants from same by placing a ring of roof paper cut three and one-half inches high about the plant. If plant does not do well examine it closely and if it contains a stalk borer a small hole will be found in the side. Squirt a few drops of a mild solution of Black Leaf 40 in the hole. If the plant does not improve in a few days cut back the plant until you find the borer. Shade the plant from direct rays of sun for two or three days and it will in all probability make a quick recovery and a healthy growth. If troubled with Aphis or Leaf Hopper spray with "Ever-

green" or "Red Arrow." Red Spider may be controlled by spraying foliage with hose.

Some growers make compact bushes of their plants by pinching out the top when three sets of leaves appear.

Never allow more than one or two stalks to grow (the flowers will be finer if only one is permitted), pull out all others.

Tie plants to stakes securely as they grow in height.

About August 1st broadcast unleached wood ashes over the soil, using about one-half pound to each hill. Keep this a few inches away from the Dahlia stalks and scatter about the plant in circle about 12 inches wide.

When buds appear scrape away enough earth and put in a trowel full of sheep manure, replace the earth and water with two or three pails of water. Repeat every two weeks and wonderful blooms may be had.

Stop cultivation and give plenty of water when flowers appear. A thorough wetting of the soil once a week will improve the blooms extensively. Disbud for large blooms by removing the two side buds, leaving main bud on each shoot; also remove the laterals below this bud to the third or fourth set; this will make long stems to your blooms.

After the frost kills the plants, dig carefully so the necks of the tubers will not be broken; cut back the stalks to three or four inches, turn down to permit to drain; dry in sun three or four hours and place (stems down) in paper lined boxes or barrels, covering with paper, bags or carpet. Dry, clean sand or dried peat is also used successfully for storage. Keep in cool, dry place and examine from time to time. Do not permit them to dry out and remove decay or mold if found.

In Spring, when eyes have developed, divide clumps with sharp knife or shears, leaving eye to each tuber.

—————:O:—————

GREEN PLANTS

Set green plants so that the earth ball is from two inches below surface of the ground where soil is heavy, to three inches in light soil. If of a clayey nature add sand or ashes, working or mixing well into the soil. Water well and protect from sun for two or three days.

Note—We shade our newly set plants with shingles, pitching them at an angle to afford more shade, and set in a three-quarter circle with open end toward the North.
